

HYGIENE CONCEPT

AESCULAPIUM, TUTTLINGEN

Update: 10.06.2022

Please note possible changes of the state government
of Baden-Württemberg

Dear participants in our courses,
dear guests,

we are looking forward to welcoming you soon on our premises. All previous measures and entrance restrictions have been cancelled. Therefore we can offer our events again without restrictions for all participants.

PLEASE OBSERVE THESE INSTRUCTIONS AND REGULATIONS

- As the number of infections is still high, we ask every participant to do a self-test in the seminar or meeting room on the first day of the event/meeting.
- The training rooms are equipped with an air conditioning system that guarantees 3-4 complete air exchanges per hour. Owing to the 100% fresh air input, viruses cannot accumulate in the air. Every room has a separate air supply.
- Wearing a medical mask / FFP2 mask in the classroom is no longer obligatory. However, for your own safety, we recommend wearing a medical mask / FFP2 mask in the seminar- or workshop room.
- There are adequate numbers of disinfectant dispensers available at the entrance and on all floors.

To ensure the safety of all participants and guests, we would like to ask you personally to take care of your health carefully and take into account the interests of all participants and employees.

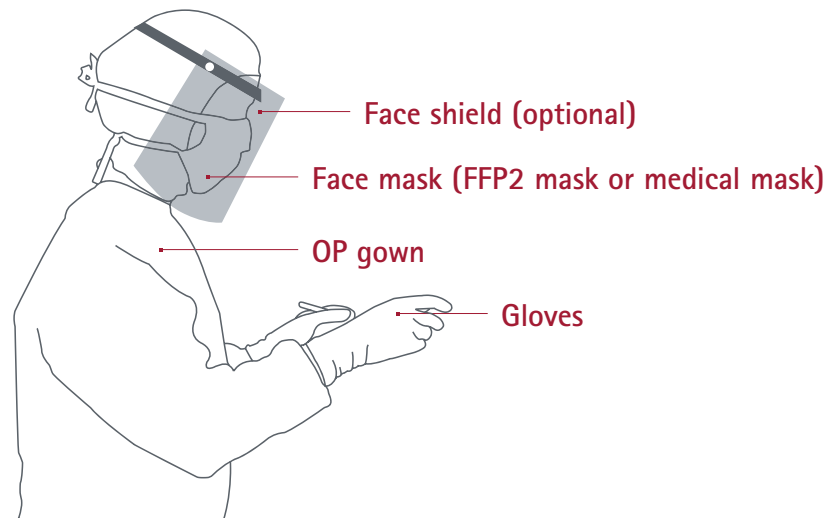

Still applies: If you have flu-like symptoms, please sign out of the event or your visit/meeting in writing.

If you have any questions, please do not hesitate to contact us at any time.

Your team at the Aesculap Academy

TRAINING IN THE WORKSHOP ROOM:

■ We recommend wearing the following protective clothing in the workshop room (optional):

- Disinfection tissues for disinfecting contact surfaces and objects will be available at every surgical workstation.
- When leaving the room, all protective clothing must be taken off completely.
- The workshop rooms are equipped with an air conditioning system that guarantees 3-4 complete air exchanges per hour. Owing to the 100% fresh air input, viruses cannot accumulate in the air. Every room has a separate air supply.
